Professional Summary

Results-driven Software Engineer with 3.5+ years of experience in PHP, CodeIgniter, and MySQL, along with working knowledge of Laravel. Experienced in developing scalable web applications and REST APIs, with a strong focus on optimizing large datasets to enhance application performance and response time. Proficient in query optimization, indexing, and designing efficient backend systems to improve speed, scalability, and reliability.

Skills

- Backend Technologies: Core PHP, CodeIgniter 3, Laravel
- Database Management: MySQL, SQL Server, Query Optimization
- Frontend Basics: HTML, CSS, JavaScript, jQuery, Bootstrap
- Additional Skills: API Integration, Debugging, SMS & Email Integration, DataTables (Server-side)

WORK EXPERIENCE

Capital Record Center Pvt. Ltd. | May 2025 – Present

Associate Software Development Engineer

- Developed and maintained enterprise applications including EzeeFile, EzeeOffice, and File Tracker for document and workflow management
- Handled large datasets (1.4L+ records) using server-side processing and optimized data retrieval
- Improved system performance by 60–70% through SQL query optimization and indexing techniques
- Developed and integrated REST APIs along with SMS and Email services for real-time communication
- Implemented workflow management and document tracking features to enhance system efficiency

Lloyd Group of Institutions | May 2023 – Apr 2025

Software Developer

- Developed and maintained ERP-based management system for handling employee, customer, and operational data
- Designed and implemented modules for attendance, fee/payment management, online transactions, and receipt generation
- Built CRM functionalities including lead management, follow-ups, and sales pipeline tracking
- Improved system performance and optimized application features using PHP, CodeIgniter, and FastAPI

Align Info Solutions Pvt. Ltd. | Oct 2022 – Apr 2023

Trainee-Research & Development

- Contributed to the development and maintenance of AlignBooks, an invoice billing and inventory management web application
- Developed responsive UI components using Angular, HTML, CSS, JavaScript, and Bootstrap
- Implemented data binding, form validations, and optimized UI performance for better user experience

PROJECTS

Document Management System

- Improved system performance by 60–70% through SQL query optimization and indexing
- Managed large datasets (1.4L+ records) using server-side DataTables
- Implemented advanced search, filtering, and pagination for efficient data retrieval
- Developed document upload functionality supporting single and multiple file uploads with metadata tagging
- Implemented CSV upload for bulk document and metadata management
- Enabled role-based access control for secure document viewing and management across users
- Designed hierarchical storage structure for organized document handling

File Tracker System

- Developed a real-time file tracking system with status updates and monitoring
- Implemented approval workflows, activity logs, and audit trails
- Integrated barcode-based search and dashboard tracking for improved visibility

EDUCATION

Master of Computer Applications (MCA) | 82% | 2021 – 2023 | GLA University, Mathura

Bachelor of Computer Applications (BCA) | 67% | 2018 – 2021 | Dr. Bhimrao Ambedkar University, Agra

Achievements

3rd Position – CBSL Group NEEV Hackathon 2025 (Server Management System using Flask + PHP)
